

SAFETY DATA SHEET

Fiddes Parquet Oil

According to Regulation (EC) No 1907/2006, Annex II, as amended by Regulation (EU) No 453/2010

1.1. Product identifier

Product name Fiddes Parquet Oil

1.2. Relevant identified uses of the substance or mixture and uses advised against

Uses advised against No specific uses advised against are identified.

1.3. Details of the supplier of the safety data sheet

Supplier

Fiddes and son Florence works, Brindley road, Cardiff. CF11 8TX +44 (0) 2920 340323 info@fiddes.co.uk +44 (0) 2920 343235

1.4. Emergency telephone number

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture

| 2.1. Classification of the substance or mixture | |
|---|--|
| Classification (EC 1272/2008) | |
| Physical hazards | Flam. Liq. 3 - H226 |
| Health hazards | STOT SE 3 - H336 Asp. Tox. 1 - H304 |
| Environmental hazards | Not Classified |
| 2.2. Label elements | |
| Pictogram | |
| | |
| Signal word | Danger |
| Hazard statements | H226 Flammable liquid and vapour. |
| | H304 May be fatal if swallowed and enters airways. |
| | H336 May cause drowsiness or dizziness. EUH208 Contains 2-butanone oxime. May produce an allergic reaction. |
| Precautionary statements | P261 Avoid breathing vapour/ spray. P271 Use only outdoors or in a well-ventilated area. P301+P310 IF SWALLOWED: Immediately call a POISON CENTER/ doctor. P304+P340 IF INHALED: Remove person to fresh air and keep comfortable for breathing. |
| | P403+P233 Store in a well-ventilated place. Keep container tightly closed. P405 Store locked up. P501 Dispose of contents/ container in accordance with national regulations. |
| Contains | Naphtha (petroleum), hydrotreated heavy |
| Supplementary precautionary statements | P312 Call a POISON CENTER/ doctor if you feel unwell. P331 Do NOT induce vomiting. |

2.3. Other hazards

This product does not contain any substances classified as PBT or vPvB.

| tion on ingredients | |
|----------------------|----------|

The Full Text for all R-Phrases and Hazard Statements are Displayed in Section 16.

SECTION 4: First aid measures

4.1. Description of first aid measures

| General information | Get medical attention if any discomfort continues. Show this Safety Data Sheet to the medical personnel. |
|------------------------------|--|
| Inhalation | Move affected person to fresh air and keep warm and at rest in a position comfortable for breathing. Maintain an open airway. Loosen tight clothing such as collar, tie or belt. When breathing is difficult, properly trained personnel may assist affected person by administering oxygen. Get medical attention. Place unconscious person on their side in the recovery position and ensure breathing can take place. |
| Ingestion | Rinse mouth thoroughly with water. Give a few small glasses of water or milk to drink. Stop if the affected person feels sick as vomiting may be dangerous. Never give anything by mouth to an unconscious person. Place unconscious person on their side in the recovery position and ensure breathing can take place. Keep affected person under observation. Get medical attention. Do not induce vomiting. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention immediately. |
| Skin contact | Rinse with water. |
| Eye contact | Rinse with water. Get medical attention if any discomfort continues. |
| Protection of first aiders | First aid personnel should wear appropriate protective equipment during any rescue. |
| 4.2. Most important symptoms | and effects, both acute and delayed |
| General information | The severity of the symptoms described will vary dependent on the concentration and the length of exposure. |
| Inhalation | A single exposure may cause the following adverse effects: Headache. Nausea, vomiting. Central nervous system depression. Drowsiness, dizziness, disorientation, vertigo. Narcotic effect. |

| Ingestion | Aspiration hazard if swallowed. Entry into the lungs following ingestion or vomiting may cause chemical pneumonitis. |
|--|---|
| Skin contact | No specific symptoms known. |
| Eye contact | No specific symptoms known. May be slightly irritating to eyes. |
| 4.3. Indication of any immedia | te medical attention and special treatment needed |
| Notes for the doctor | Treat symptomatically. |
| SECTION 5: Firefighting meas | sures |
| 5.1. Extinguishing media | |
| Suitable extinguishing media | The product is flammable. Extinguish with alcohol-resistant foam, carbon dioxide, dry powder or water fog. Use fire-extinguishing media suitable for the surrounding fire. |
| Unsuitable extinguishing media | Do not use water jet as an extinguisher, as this will spread the fire. |
| 5.2. Special hazards arising fro | om the substance or mixture |
| Specific hazards | Containers can burst violently or explode when heated, due to excessive pressure build-up. Flammable liquid and vapour. Vapours may be ignited by a spark, a hot surface or an ember. Vapours may form explosive mixtures with air. Fire-water run-off in sewers may create fire or explosion hazard. |
| Hazardous combustion products | Thermal decomposition or combustion products may include the following substances: Harmful gases or vapours. |
| 5.3. Advice for firefighters | |
| Protective actions during firefighting | Avoid breathing fire gases or vapours. Evacuate area. Keep upwind to avoid inhalation of gases, vapours, fumes and smoke. Ventilate closed spaces before entering them. Cool containers exposed to heat with water spray and remove them from the fire area if it can be done without risk. Cool containers exposed to flames with water until well after the fire is out. If a leak or spill has not ignited, use water spray to disperse vapours and protect men stopping the leak. Control run-off water by containing and keeping it out of sewers and watercourses. If risk of water pollution occurs, notify appropriate authorities. |
| Special protective equipment for firefighters | Wear positive-pressure self-contained breathing apparatus (SCBA) and appropriate protective clothing. Firefighter's clothing conforming to European standard EN469 (including helmets, protective boots and gloves) will provide a basic level of protection for chemical incidents. |
| SECTION 6: Accidental releas | e measures |
| | |

6.1. Personal precautions, protective equipment and emergency procedures

Personal precautionsWear protective clothing as described in Section 8 of this safety data sheet. No action shall be
taken without appropriate training or involving any personal risk. Evacuate area. Provide
adequate ventilation. No smoking, sparks, flames or other sources of ignition near spillage.
Promptly remove any clothing that becomes contaminated. Avoid inhalation of dust and
vapours. Use suitable respiratory protection if ventilation is inadequate.

6.2. Environmental precautions

Environmental precautions Avoid discharge into drains or watercourses or onto the ground.

6.3. Methods and material for containment and cleaning up

| Methods for cleaning up <u>6.4. Reference to other section</u> | — |
|---|---|
| Reference to other sections | For personal protection, see Section 8. See Section 11 for additional information on health hazards. See Section 12 for additional information on ecological hazards. For waste disposal, see Section 13. |
| SECTION 7: Handling and sto | rage |
| 7.1. Precautions for safe hand | ling |
| Usage precautions | Read and follow manufacturer's recommendations. Wear protective clothing as described in Section 8 of this safety data sheet. Keep away from food, drink and animal feeding stuffs. Handle all packages and containers carefully to minimise spills. Keep container tightly sealed when not in use. Avoid the formation of mists. The product is flammable. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Do not handle until all safety precautions have been read and understood. Do not handle broken packages without protective equipment. Do not reuse empty containers. |
| Advice on general occupational hygiene | Wash promptly if skin becomes contaminated. Take off contaminated clothing. Wash contaminated clothing before reuse. |
| 7.2. Conditions for safe storage | e, including any incompatibilities |
| Storage precautions | Store locked up. Keep away from oxidising materials, heat and flames. Keep only in the original container. Keep container tightly closed, in a cool, well ventilated place. Keep containers upright. Protect containers from damage. |
| Storage class | Flammable liquid storage. |
| 7.3. Specific end use(s) | |
| Specific end use(s) | The identified uses for this product are detailed in Section 1.2. |
| SECTION 8: Exposure Control | ls/personal protection |
| 8.1. Control parameters | |
| 8.2. Exposure controls | |
| Protective equipment | |
| | |
| Appropriate engineering controls | Provide adequate general and local exhaust ventilation. Ensure the ventilation system is regularly maintained and tested. Good general ventilation should be adequate to control worker exposure to airborne contaminants. Observe any occupational exposure limits for the product or ingredients. |
| Eye/face protection | Unless the assessment indicates a higher degree of protection is required, the following protection should be worn: Tight-fitting safety glasses. |
| Hand protection | It is recommended that chemical-resistant, impervious gloves are worn. |
| Other skin and body protection | Wear appropriate clothing to prevent repeated or prolonged skin contact. |

| smoking and using the toilet. Do not eat, drink or smoke when using this product. Respiratory protection Ensure all respiratory protective equipment is suitable for its intended use and is 'CE Check that the respirator fits tightly and the fitter is changed regularly. Gas and comply with European Standard EN1387. Full face mask re with replaceable filter cartridges should comply with European Standard EN138. Ha and quarter mask respirators with replaceable filter cartridges should comply with European Standard EN138. Ha and quarter mask respirators with replaceable filter cartridges should comply with European Standard EN138. Ha and quarter mask respirators with replaceable filter cartridges should comply with European Standard EN138. Ha and quarter mask respirators with replaceable filter cartridges should comply with European Standard EN138. Ha and quarter mask respirators with replaceable filter cartridges should comply with European Standard EN138. Ha and quarter mask respirators with replaceable filter cartridges should comply with European Standard EN138. Ha and quarter mask respirators with replaceable filter cartridges should comply with European Standard EN138. Ha and quarter mask respirators with replaceable filter cartridges should comply with European Standard EN138. Ha and quarter mask respirators with replaceable filter cartridges should comply with European Standard EN138. Ha and quarter mask respirators with replaceable filter cartridges should comply with European Standard EN138. SECTION 9: Physical and Chemical properties Appearance Liquid. Colour Amber. Odour Odour Characteristic. Filter cartridges should comply with the product. 10.1. Reactivity Reactivity There | | |
|--|-----------------------------------|--|
| Check that the respirator fits tightly and the filter is changed regulary. Casis and com filter cartridges should comply with European Standard EN136. Ha and quarter mask respirators with replaceable filter cartridges should comply with European Standard EN136. Ha and quarter mask respirators with replaceable filter cartridges should comply with European Standard EN136. Ha SECTION 9: Physical and Chemical Properties 9.1. Information on basic physical and chemical properties Appearance Liquid. Colour Amber. Odour Characteristic. Flesh point 42° C CC (Closed cup). 9.2. Other information Stable at normal ambient temperatures and when used as recommended. Stable or prescribed storage conditions. 10.1. Reactivity Reactivity Reactivity There are no known reactivity hazards associated with this product. 10.2. Chemical stability Stable at normal ambient temperatures and when used as recommended. Stable or prescribed storage conditions. 10.3. Possibility of hazardous The following materials may react strongly with the product: Oxidising agents. reactions Avoid heat, flames and other sources of ignition. Containers can burst violently or ex when heated, due to excessive pressure build-up. Static electricity and formation of must be prevented. 10.4. Conditions to avoid Oxidising materials. Acids | | Wash hands thoroughly after handling. Wash at the end of each work shift and before eating, smoking and using the toilet. Do not eat, drink or smoke when using this product. |
| controls SECTION 9: Physical and Chemical Properties 9.1. Information on basic physical and chemical properties Appearance Liquid. Colour Amber. Odour Characteristic. Flash point 42°C CC (Closed cup). 9.2. Other information | | Ensure all respiratory protective equipment is suitable for its intended use and is 'CE'-marked. Check that the respirator fits tightly and the filter is changed regularly. Gas and combination filter cartridges should comply with European Standard EN14387. Full face mask respirators with replaceable filter cartridges should comply with European Standard EN136. Half mask and quarter mask respirators with replaceable filter cartridges should comply with European Standard EN140. |
| 9.1. Information on basic physical and chemical properties Appearance Liquid. Colour Amber. Odour Characteristic. Flash point 42°C CC (Closed cup). 9.2. Other Information | - | Keep container tightly sealed when not in use. |
| Appearance Liquid. Colour Amber. Odour Characteristic. Flash point 42°C CC (Closed cup). 9.2. Other information SECTION 10: Stability and reactivity SECTION 10: Stability and reactivity Inhere are no known reactivity hazards associated with this product. 10.1. Reactivity There are no known reactivity hazards associated with this product. 10.2. Chemical stability Stable at normal ambient temperatures and when used as recommended. Stable ur prescribed storage conditions. 10.3. Possibility of hazardous The following materials may react strongly with the product: Oxidising agents. reactions The following materials may react strongly with the product: Oxidising agents. 10.4. Conditions to avoid Avoid heat, flames and other sources of ignition. Containers can burst violently or exwhen heated, due to excessive pressure build-up. Static electricity and formation of must be prevented. 10.5. Incompatible materials Materials to avoid Oxidising materials. Acids - oxidising. 10.6. Hazardous decomposition products Does not decompose when used and stored as recommended. Thermal decompositor products acmbustion products may include the following substances: Harmful gases or vapout scombustion products may include the following substances: Harmful gases or vapout scombustion products may include the classification criteria are not met. | 12.6. Other adverse effects | |
| Other adverse effects | None known. |
| SECTION 13: Disposal consid | erations |
| 13.1. Waste treatment method | |
| General information | The generation of waste should be minimised or avoided wherever possible. Reuse or recycle products wherever possible. This material and its container must be disposed of in a safe way. When handling waste, the safety precautions applying to handling of the product should be considered. Care should be taken when handling emptied containers that have not been thoroughly cleaned or rinsed out. Empty containers or liners may retain some product residues and hence be potentially hazardous. |
| Disposal methods | Dispose of surplus products and those that cannot be recycled via a licensed waste disposal contractor. Waste, residues, empty containers, discarded work clothes and contaminated cleaning materials should be collected in designated containers, labelled with their contents. Incineration or landfill should only be considered when recycling is not feasible. |
